# Our Reports – The Opinion

## AUDIT OPINIONS

Based on an assessment of the strengths and weakness of the areas examined, and through testing it has been concluded that the effectiveness of the internal control environment is considered to be sound and therefore **substantial assurance** can be placed upon the management of risks. This overall opinion is supported by the identification of a well-controlled system where only minor recommendations may have been made where it is considered that the action required is desirable and should result in enhanced control or improved value for money.

**Substantial Assurance**

Based on an assessment of the strengths and weaknesses of the areas examined, and through testing, it has been concluded that the effectiveness of the internal control environment is **reasonable**. This overall opinion is supported by the identification of risks in some areas of the system, which although not substantial in nature could compromise the overall control environment. Action is considered necessary to avoid potential exposure to significant risks.

**Reasonable Assurance**

Based on an assessment of the strengths and weaknesses of the areas examined, and through testing, it has been concluded that the effectiveness of the internal control environment is unsatisfactory and therefore only **limited assurance** can be placed upon the systems of internal control. This overall opinion is supported by the identification of a combination of fundamental and/or significant weaknesses where action is considered imperative to ensure that the Council is not exposed to high risks.

**Limited Assurance**

Based on an assessment of the strengths and weaknesses of the areas examined, and through testing, it has been concluded that the effectiveness of the internal control environment is unsound and therefore **no assurance** can be given at this time. This overall opinion is supported by the identification of fundamental weaknesses where action is imperative to ensure that the Council is not exposed to high risks.

**No Assurance**

# Our Recommendations

*Risk may be viewed as the chance, or probability, of one or more of the organisation's objectives not being met. It refers both to unwanted outcomes which might arise, and to the potential failure to realise desired results.*

*The criticality of each recommendation is as follows:*

- Fundamental: Action that is considered imperative to ensure that the organisation is not exposed to high risks*
- Significant: Action that is considered necessary to avoid exposure to significant risks*
- Merits Attention: Action that is considered desirable and should result in enhanced control*
