CORPORATE PERFORMANCE AND RESOURCES SCRUTINY COMMITTEE:
20TH MARCH, 2024

REFERENCE FROM GOVERNANCE AND AUDIT COMMITTEE: 5TH FEBRUARY,

“766 ANNUAL WHISTLEBLOWING REPORT (MO/HLDS) –

The report was presented, the purpose of which was to provide Committee with an annual update and summary of results of a staff survey undertaken to ascertain awareness of and willingness to use the Council's Whistleblowing Policy.

The Council adopted the Whistle Blowing Policy (the Policy) in 2014. The Policy was reviewed in 2019 and the revised Policy was endorsed by Audit Committee on the 3rd February, 2020. The purpose of the Policy was to ensure that employees of the Council were aware of their responsibility to the public and to protect individuals who may need to disclose information concerning any 'malpractice' within the Council, including any confidential information which related to some danger, fraud or other illegal or unethical conduct connected with the workplace, be it of the employee or a fellow employee.

With 11 incidents reported, 2022/23 saw the highest annual number of whistleblowing incidents recorded (2021/22) and was significantly higher than the rolling 8-year average of 4.15 per annum.

Monitoring Officers from 21 other Welsh Local Authorities were canvassed to ascertain the number of Whistleblowing incidents recorded to allow for comparison. Nine responses were received indicating a total of 36 incidents were recorded, an average of 4 incidents per Authority in 2022/23. However, 1 Authority accounted for 17 incidents, 2 recorded 5 incidents, 2 Authorities recorded 3 incidents and 2 Authorities recorded 0 incidents.

Of the 33 incidents reported over the past 8 years, Learning and Skills Directorate showed the lowest number at 3, Environment and Housing Directorate had the highest number of reported incidents at 13. During 2021/22 the Council saw an increase in corporate complaints from members of the public to 495 (2021/22: 358) and 51 under the Social Services Complaints Procedure (Wales) Regulations 2014. The Welsh Language Commissioner received 3 complaints from members of the public, 2 of which were upheld. Complaints referred from the Public Service Ombudsman for Wales fell from 61 in 2021/22 to 49. These complaints were analysed in a separate Annual Corporate Complaints and Compliments Report 2021/22.

Critical to the success of the Policy was staff awareness and understanding together with a willingness to report issues.

In June 2022 the Council launched the “Speak Out” Hub on Staffnet. The hub acts as a single point of access for staff to gain information about the Policy and included an online form which allowed staff to quickly and easily report issues. This was supported by a confidential Speak Out Line telephone service which provided a safe and confidential way for staff to report issues and concerns covered by the Policy.

Following an internal promotional campaign during Quarter 2 in 2023, a staff survey was undertaken to assess staff awareness of the Policy during October and November 2023. A number of activities were undertaken to encourage participation by colleagues and increase responses; this included maintaining previous branding and content to ensure high levels of recognition by colleagues. In addition, promotional activities and opportunities to engage with the survey from the successful 2022 project were replicated. Use of survey functionality within the Councils Meta Compliance platform (normally used to promote Council policies) was explored, however this could not be used due to non-compliance with Welsh Language standards.

A decision was made to use Participate Vale, the Council’s engagement platform, to host the “Speak Out” Survey rather than Microsoft Forms. Participate Vale had a sophisticated and easy to use survey building process, engagement tools, analytics and reporting functions. The survey broadly used the same questions as those used previously to allow comparison. A total of 288 staff responded to the 2023 survey from 21 Service Areas. This was a reduction on the number of respondents for 2021/22 of 232.

The survey results indicated that promotional work undertaken to raise awareness of the policy was having a positive impact with the percentage of colleagues increasing from 75% to 92% stating that they have an increased awareness of the Policy. This should be tempered by the fact that only 49% of respondents had read the policy, although 54% stated that they had read the “Whistleblowing policy on a page” or watched the summary video. The percentage of respondents able to identify all 10 areas of malpractice covered by the Policy fell to 53.29% (2021/22: 68%), although a further 10.73% were able to identify 9 areas. Only 0.35% were not able to identify any areas. Although this seemed incongruous with the fact that 92% were aware of the policy, it reflected the fact that under 50% of respondents had read it.

There was a need to improve colleague knowledge in this area of the policy through future promotional work. Encouraging the percentage of respondents who stated that they were willing to report issues, increased to 68% (2021/22 58%). Where staff were aware of the legal protections afforded to them, the percentage willing to report issues under the Policy rose to 72%. Where respondents gave reasons why they would not be willing to report whistleblowing incidents, a fear of potential consequences for themselves emerged as a clear theme. A full analysis of survey responses was provided in Appendix B to the report.

Fifteen Whistleblowing incidents had been reported since 1st April, 2023. Ten were currently under investigation, 2 were outside of the Policy and were considered under other Council Policies such as the Grievance Policy, and 3 incidents were not upheld. As a result of the survey results, promotional work would be undertaken

annually to promote awareness of the Policy and the legal protections afforded to Whistleblowers in an effort to increase staff willingness to report issues.

Work was being undertaken to explore how Speak Out Survey response rates could be increased. This included changes to branding and promotional activities, undertaking research with staff members to understand the factors that affect whether they would complete the survey and using this feedback to design a more effective campaign. Annual staff surveys would be undertaken to track progress in those areas, with results reported to Governance and Audit Committee.

Councillor Hooper stated that it was unclear whether an increase in notifications was a positive insofar as more staff were more confident in using the policy or whether there were some further issues that needed to be understood. Councillor Hooper referred to the recommendation of the Standards Committee that 100% of staff be made fully aware of the Whistleblowing Policy and he stated that that was probably already the Council objective.

In reply, the Monitoring Officer/Head of Legal and Democratic Services stated that in terms of the 100% performance target the aim was to reach as high as possible and so a significant amount of promotional work had been undertaken with a range of approaches. Inclusion of the Whistleblowing Policy into the packs for new staff would be encouraged and there would be consideration of whether whistleblowing should be mandatory training. However, there was a concern in relation to staff demands, particularly in relation to staff being over-surveyed which could impact on the level of responses. Regarding the increased number of notifications, the Council had identified some common themes, and these would be looked at more closely with other Council colleagues. In addition, it was important for the Council to fully capture all matters raised within the Whistleblowing Policy so that an assessment of the trends could be undertaken including ways of tackling concerns.

Mr. Ireland (Lay Member) stated that there was a concern highlighted within the survey particularly in relation to question 8 and staff being apprehensive to use the Policy. Mr. Ireland also queried whether investigations were carried out by an independent officer. In reply, the Monitoring Officer/Head of Legal and Democratic Services advised that investigations would be undertaken by staff from within the Internal Audit Service. The Monitoring Officer/Head of Legal and Democratic Services said that in terms of barriers preventing staff from using the Whistleblowing Policy that a piece of work was required by the Human Resources Department and some of that work had already begun, and the actions taken by the Council would be circulated outside of the meeting. The Monitoring Officer/Head of Legal and Democratic Services added that there had been a significant push to broaden the opportunities for staff to whistle blow and that had extended far and wide across the organisation and from a cultural perspective and in comparison, to other local authorities, the Vale of Glamorgan had made good progress.

Councillor Norman queried whether a complainant had the right to appeal if they were not happy with the outcome of an investigation and would the complainant be fully advised of the outcome. In reply, the Monitoring Officer/Head of Legal and Democratic Services stated that all complainants would be informed of the outcome of the complaint and whether that complaint was being moved forward and being

investigated. However, if there were disciplinary matters then the outcomes of those would be confidential. The Monitoring Officer/Head of Legal and Democratic Services also clarified that within the Whistleblowing Policy there was not a right of appeal although there were other Council Policies which the complaint could be referred to that did contain the right of appeal.

Councillor Wood queried whether most notifications were made through a person's line manager or through the 'Speak Out' line. In reply, the Monitoring Officer/Head of Legal and Democratic Services stated that most came through the 'Speak Out' line and it was important to outline that the Council actively promoted every avenue available for a person to raise an issue. It was also important to recognise that the Whistleblowing Policy was a regular item on all team meetings so the Council had undertaken a robust awareness raising campaign.

In reply to a question from Councillor Protheroe regarding support available to staff who had used the Whistleblowing Policy, the Monitoring Officer/Head of Legal and Democratic Services stated that some information would be shared with members of the Committee. Most notifications through the Whistleblowing Policy came through anonymously and the Council ensured that cases were handled extremely carefully and sensitively.

The Chair, stated that he had previously commented on the under reporting of complaints made to the Council particularly to those queries raised directly to Elected Members. In addition, the Chair referred to the 288 individual responses to the staff survey, and he stated that it would be useful to show that as a percentage of the total staff group which could be in the 1000s. In addition, he also stated that there were a number of responses for each service area, but again it would be useful to include the total number of staff within each area. The Chair also referred to the Panel Review undertaken by the Standards Committee and queried whether the findings of the Review could be presented to the Governance and Audit Committee. In reply, the Monitoring Officer/Head of Legal and Democratic Services stated that in terms of issues raised directly with Elected Members, this would be considered but there would be a need to differentiate between a service query and an actual complaint. Information relating to staff teams would be included in future reports and further information shared electronically. The Monitoring Officer/Head of Legal and Democratic Services agreed that as the Panel Review report was being referred to Cabinet there was no reason why the report could not also be presented to the Governance and Audit Committee but as a Part II item.

Mr. Evans (Lay Member) raised a comment regarding whistleblowing being mandatory training and he stated that that could be a simple five or ten minute video with a few questions at the end to ascertain the level of understanding.

Several comments were raised in relation to Whistleblowing being part of the mandatory training programme and it was noted that a review of training requirements was being undertaken as part of the Council's Peoples Strategy which would be referred for consideration by the Corporate Performance and Resources Scrutiny Committee. The Head of Human Resources stated that as part of that Review a number of training modules had been flagged up as being appropriate as

mandatory training, so it was important to consider the training programme as a whole.

Subsequently it was

Recommendations

1. That Governance and Audit Committee note the contents of the report.
2. That Governance and Audit Committee continue to receive Annual Reports in relation to policy implementation and incidents.
3. That Governance and Audit Committee continue to receive annual reports in relation to staff survey results.

Reasons for Recommendations

1. 2, &3 To ensure the effective monitoring of whistleblowing incidents and staff awareness of the Policy is undertaken.

1. Background

- 1.1 The Council adopted the Whistleblowing Policy (the Policy) in 2014. The Policy was reviewed in 2019 and the revised Policy was adopted in 2020.
- 1.2 The purpose of the Policy is to ensure that employees of the Council are aware of their responsibility to the public and to protect individuals who may need to disclose information concerning any 'malpractice' within the Council, including any confidential information which relates to some danger, fraud or other illegal or unethical conduct connected with the workplace, be it of the employee or a fellow employee.
- 1.3 The Policy and procedures apply to employees of the Vale of Glamorgan Council (excluding those employed at a schoolboy a School Governing Body), temporary employees, trainees, and independent contractors as well as those engaged through an agency.
- 1.4 The Policy confirms the standards expected from employees and sets out a framework within which staff can make a "protected disclosure" without fear that they will be subjected to victimisation or dismissal as long as the disclosure is made in the public interest in accordance with the Public Interest Disclosure Act 1998 (the Act).
- 1.5 The Act identifies that staff can make a "protected disclosure" if in the reasonable belief of the member of staff making the disclosure intends to show one or more of illegal practices, a failure to comply with legal obligation, the health and safety of an individual (member of the public or staff) being endangered, damage to the environment, a miscarriage of justice and/or the deliberate concealment of these.
- 1.6 The Operational Manager for Customer Relations is responsible for the registration and maintaining a central record of all Whistleblowing concerns and to monitor progress and outcome of each investigation.

- 1.7 Directors are responsible for the receipt and population of the Whistleblowing central register and for the effective operation of the policy within their own Directorate. This includes ensuring that each employee is aware of the Policy and how to use it, managers are effectively trained in the use of the Policy and whistleblowing concerns are appropriately recorded and managed.
- 1.8 The Governance and Audit Committee acting through the Monitoring Officer has within its terms of reference overall responsibility for the maintenance and operation of the Whistleblowing Policy with the Head of Human Resources and Organisational Development having responsibility for updating the Policy as appropriate. The Monitoring Officer is responsible for reporting to the Governance and Audit Committee in a confidential format.
- 1.9 Since June 2022 staff, managers and internal audit have been able to report Whistleblowing incidents on the Granicus-Firmstep GovService platform and this has become the central register for incidents. The platform records investigation progress and outcomes and access to records is strictly controlled by user access permissions.
- 1.10 The staff survey (Appendix B) has been undertaken to ascertain staff awareness of the Policy and the legal protections available to whistleblowers, together with staff willingness to report incidents and concerns.

2. Key Issues for Consideration

- 2.1 Marketing and promotional activity has been undertaken since 2021/22 focussed on raising awareness of the policy, protections afforded to whistleblowers and the importance of using the policy to highlight areas of concern and malpractice as a way of improving services to residents.
- 2.2 A comprehensive promotional activities campaign was undertaken during October 2023 which included publicising the Policy on Staffnet, placing posters on staff noticeboards and email bulletins, in addition to internal departmental arrangements and promotion at staff meetings.
- 2.3 During 2022 the range of opportunities available to staff were increased to include an online form available on Staffnet, a confidential Speak Out telephone service provided by Customer Relations and a new Speak Out email address monitored by Internal Audit. These options were implemented to complement the reporting routes which were already in existence and to remove barriers to colleagues reporting of issues while maintaining confidentiality.
- 2.4 During 2022/23 11 reports were made through the Whistleblowing Policy, 5 relating to Social Services, 4 to Environment and Housing and 1 each for Corporate Resources and Place. No reports were received in relation to Learning & Skills.
- 2.5 The average number of reports made stands at 4.15 per annum over the past 8 years with 2022/23 seeing the highest number reports (Appendix A).
- 2.6 Monitoring Officers from 9 Welsh Authorities shared Whistleblowing data for 2022/23. Vale of Glamorgan Council recorded the second highest number of

incidents, with one Council recording 17. Two Councils reported no incidents as having been recorded.

- 2.7** Of the 34 incidents reported over the past 8 years, 17 were not upheld, 5 were partially upheld and 2 have been upheld. Others were deemed to be outside of policy or are currently under investigation.
- 2.8** A total of 12 incidents related to Illegal Practices (including Fraud or misuse of Council assets and equipment), 10 related to failure to Meet Legal Obligations (including mishandling of funds, and employment disputes), Five to Health and Safety concerns. No incidents related to damage to the Environment or Miscarriage of Justice. Six reports were deemed to fall outside of the policy.
- 2.9** It should be noted that previously issues reported using the Policy, but which were deemed to fall outside of Policy have not been formally recorded or reported but instead redirected and dealt with under the appropriate Policy.
- 2.10** In October 2023 a comprehensive promotional campaign was undertaken to raise staff awareness of the Policy and the reporting options available to staff. In addition, 'a Policy on a Page' paper was prepared and shared with Heads of Services for disseminating within Team Meetings, the same was also shared with Departmental Management Team Meetings and discussions have taken place at Senior Leadership Team level.
- 2.11** The Council recognises the importance of being able to learn from Whistleblowing investigations to improve the specific situation and where applicable to apply this learning more widely to reduce the risk of similar issues arising. Actions arising from investigations have been included to revise and strengthen processes and procedures, improving communication with staff, undertaking staff training and instigation of disciplinary procedures (1 instance).
- 2.12** A staff survey was undertaken between during October and November 2023 to assess the effectiveness of the promotional activity, highlight common themes and identify opportunities to improve awareness, access and willingness to report issues. In order to maximise the response rate staff were given the opportunity to respond to the survey online or using a paper survey.
- 2.13** A full analysis of survey responses is provided in Appendix B.
- 2.14** A total of 288 staff members responded to the survey from 21 different services. The highest number of responses was received from Environment & Housing, amounting to 33% of the total with Learning & Skills amounting to 27%. Responses from Social Services directorate accounted for 21% of respondents, with Resources directorate totalling 16%.
- 2.15** Future promotional activity will be targeted in those services with low response rates to ensure that data supplied provides as complete a picture as possible of attitudes of staff from across the council.
- 2.16** The need to promote a wider awareness of the Policy emerged as a key theme from survey results. The percentage of respondents who stated that they had heard of the Policy increased from 75% in 2022 to 92% in 2023. In addition, the

number of respondents who said that they had read the Policy improved from 41% to 49%.

- 2.17** Encouragingly, a high proportion of respondents were able to identify most of the policy areas covered by the Policy with 68% identifying at least 9 areas; 87% recognised “A breach of our Code of Conduct for Staff or Councillors” as an area covered; while 85% recognised “Suspected fraud or Corruption”, “Sexual, physical, or verbal abuse of our clients” and “Conduct which is a criminal offence or breach of law” respectively.
- 2.18** “Damage to the environment” continued to be the least recognised area with only 71% (76%) of respondents recognising this as an area covered by the Policy. This is an area for future promotional focus.
- 2.19** Willingness of staff to report issues under the Policy is critical to achieving its objectives. Encouragingly the number of respondents indicating that they would be willing to whistleblow, increased to 68% compared to 58% in 2022.
- 2.20** A key reason given by staff who were unwilling to report issues was a concern that there would be negative consequences for them. One respondent stated that “At present I do not feel that I would get the support and protection from the council”, while another stating that they had a “fear of losing their job”.
- 2.21** Where staff are aware of the legal protections afforded to whistleblowers, willingness to report issues increased significantly to 72%. Respondents reporting that they were aware of protections increased from 48% in 2022 to 74%.
- 2.22** Reporting to a line manager is the most popular choice with 67% (in comparison to 65% previously) of respondents. The number of respondents indicating that they would use the online form increased from 30% to 37%, followed by Head of Service at 35%. 29% stated that they would use the Speak out email address, and 21% stated that they would use the Speak Out telephone line. Respondents were given the option of choosing more than one response for this question.
- 2.23** When respondents were asked to provide ideas about how the Council could improve awareness of the Policy, attendance at team meetings and briefing sessions was a popular option. Hosting workshops for staff and creation of a training video were also popular suggestions.
- 2.24** The key themes identified by the staff survey will be addressed during the next annual promotional campaign, with impact tracked through annual staff surveys.
- 2.25** In addition, a Panel review was undertaken by three Independent/Co-opted Members of the Standards Committee flowing from an historical case, and as part of that review Standards Committee will be considering as a Part II item at its meeting on the 2nd of February 2024 a series of recommendations. A verbal update will be provided at Governance and Audit Committee in this regard.

3. How do proposals evidence the Five Ways of Working and contribute to our Well-being Objectives?

- 3.1** The Policy provides opportunity for staff to highlight concerns regarding the way the council works, ensuring resources are used sustainably and in a way the best benefits residents.

4. Climate Change and Nature Implications

- 4.1** The Policy provides opportunity for staff to highlight concerns regarding the way in which council activities impact on the local environment.

5. Resources and Legal Considerations

Financial

- 5.1** The Policy helps ensure that Council funds and resources are used appropriately.

Employment

- 5.2** There is a resource impact in relation to the investigation and resolution of concerns raised under the Policy. The impact is borne by directorates and Internal Audit.

Legal (Including Equalities)

- 5.3** The Policy helps ensure that crime committed by Council employees in undertaking their duties can be detected and addressed.

Anonymous 11/06/2023 08:27 AM	I have not read the policy myself (not that I can recall anyway). but I suspect the policy contains the necessary protection so difficult to comment. What definitely should occur is the continuous promotion of the whistleblowing policy, advertising and publishing cases when staff are 'dealt with' accordingly which helps to show other staff that cases are being dealt with appropriately which should encourage others to come forward to report matters. THE most important thing in my view is for council staff to see action being taken or read about the results when whistleblowing has occurred and is found to be substantiated.

Anonymous

10/23/2023 03:32 PM

I have worked for the Council for a long time and had a problem with my line manager and went above her head to my old manager. My old manager said 'if you had gone above me when I was was manager, I would not have been very happy'. That was it, no why, what, etc. In the end I typed up some bullet points and met with my supervisor and he asked if he could keep the bullet points, so he could remember them. He then behind my back, submitted them to HR. HR phoned me and said this would stay on my record, so I asked them to withdraw them immediately. I felt very unsupported and has put me off saying anything going forward. I've totally lost the trust of my employer helping me when I needed it. The manager has since left and I still happily in my job, which I am more than capable off.

I think it depends on the reason, if i felt threatened in any way or if i did not feel confident that i would be supported in the right way. Also for fear of being outcast by others. If its a member of my team or managers, it makes things awkward in the working environment. That's a lot of time working together in a team every day if feeling unhappy and unsupported. However if there is a safety consequence of a colleague or member of public, by not speaking out, i think i would have to and worry about the outcome later.

I still don't believe there is a culture in the organisation that fairly and impartially reviews complaints or that there is sufficient protection for staff that use the whistleblowing policy from potential repercussions, especially from senior leaders within the pockets of the organisation. This is clearly evident from patterns of inappropriate behaviour that are obvious in some directorates that isn't challenged or dealt with, but instead more junior members of staff are treated as "sacrificial lambs" and either chose to leave or are forced to leave.

the investigation process is flawed, the person accused does not get to see the allegation and is investigated as if they have been found guilty before the process starts. There are no updates on the process to the accused. There needs to be a two way approach.

11/13/2023 01:22 PM

Previous experience. I left my last employer after 23 years following my telling everything I knew about the fraud and corruption that was being perpetrated by my managers during an audit. They kept their jobs and I left. One has since retired and the other is still in post. I didn't whistle blow before that as I was not convinced that any protection in place would really keep me safe, especially if I stayed in the organisation. Following my departure, and her retirement, one of my managers contacted me by letter which was very unpleasant. This is a complicated issue and any 'Yes' answers that you receive to question 6 are probably from people who have been lucky enough never to have had to consider it.

It would depend on the severity of the situation. If it was something small I'd try and resolve it using Line Management system first. I'd also need to check the whistle-blowing policy again to ensure the details (that my issue came under it and that I was protected) as it's many years since I read it.

I think there's a stigma around whistleblowing in general as it can potentially be quite confrontational. open conversations within the workplace (in supervisions, team meetings and informal supervisor conversations) could reduce or manage the anxiety people feel around whistleblowing.
