THE VALE OF GLAMORGAN COUNCIL

HEALTHY LIVING AND SOCIAL CARE SCRUTINY COMMITTEE: 5TH MARCH, 2019

REFERENCE FROM CABINET: 4TH FEBRUARY, 2019

"C573 DIRECTORATE OF ENVIRONMENT AND HOUSING - PROPOSED FEES AND CHARGES FOR 2019/2020 (NST & SCHL)

The Cabinet Member for Neighbourhood Services and Transport presented the report, the purpose of which was to seek approval from Cabinet for fees and charges for the Directorate for 2019/2020. The fees and charges recommended mainly reflected an inflationary increase of 3.2% rounded up to the nearest 10p with some fees and charges having been increased in addition to inflation to reflect the take up of services and the cost of delivery. A small number had remained the same but these were generally refundable deposits which had been left at rounded amounts such as £100.00.

The Cabinet Member apprised his colleagues on exceptions as follows:

- The alternative approach proposed for areas such as Kings Square follows the principles contained within the income generation and commercial opportunities strategy and this is aimed at increasing commercial income;
- A new charge is proposed for replacement allotment keys of £16.60;
- Charges are recommended for bench or plaque dedications as there is an opportunity to significantly increase sales;
- It is recommended to increase the charges relating to commercial food waste collections due to higher collection and disposal costs; and
- A new charge is proposed for a proof of address letter for street naming and numbering.

This was a matter for Executive decision.

Cabinet, having considered the report and all the issues and implications contained therein

RESOLVED -

(1) T H A T the proposals for fees/charges and required policy/process changes as set out in the report and the associated appendices be approved.

(2) T H A T delegated authority be granted to the Director of Environment and Housing in consultation with the relevant Cabinet Member and the Head of Finance to vary fees detailed in the report should a business need be established. (3) T H A T the report be referred to Environment and Regeneration and Healthy Living and Social Care Scrutiny Committees for consideration.

Reasons for decisions

(1) To obtain Cabinet's approval of the charging and fees proposed for 2019/2020.

(2) To allow minor 'in year' charging variations to be made promptly should there be a particular business need to do so.

(3) To allow the charges and fees proposed to be considered, by the relevant Scrutiny Committee."

Attached as Appendix - Report to Cabinet: 4th February, 2019

Name of Committee:	Cabinet
Date of Meeting:	04/02/2019
Relevant Scrutiny Committee:	Environment and Regeneration
Report Title:	Directorate of Environment and Housing - Proposed Fees and Charges for 2019 / 2020
Purpose of Report:	To propose changes in service charges for functions managed by the Directorate for the financial year 2019/20
	Cabinet Member for Neighbourhood Services and Transport
Report Owner:	Cabinet Member for Social Care, Health and Leisure
Responsible Officer:	Miles Punter Director of Environment and Housing Services
	No Elected Members have been consulted
	Head of Neighbourhood Services and Transport
	Operational Manager - Neighbourhood Services: Operations
	Operational Manager - Engineering
Elected Member and	Operational Manager - Neighbourhood Services: Healthy Living and Performance
Officer Consultation:	Directorate Accountant
	Business Manager
	Committee Reports
	Equality Officer
	Operational Manager – Performance and Policy
Policy Framework:	This is a matter for executive decision by Cabinet.

Executive Summary:

 This report seeks approval of Cabinet for fees and charges for the Directorate for 2019 / 2020. The fees and charges recommended mainly reflect an inflationary increase of 3.2% rounded up to the nearest 10p. Some fees and charges have increased in addition to inflation to reflect the take up of services and the cost of delivery. A small number have remained the same but these are generally refundable deposits which been left at rounded amounts such as £100.00

Exceptions to this include:

- The alternative approach proposed for areas such as Kings Square follows the principles contained within the income generation and commercial opportunities strategy and this is aimed at increasing commercial income.
- A new charge is proposed for replacement allotment keys of £16.60.
- Charges are recommended for bench or plaque dedications as there is an opportunity to significantly increase sales.
- It is recommended to increase the charges relating to commercial food waste collections due to higher collection and disposal costs.
- A new charge is proposed for a proof of address letter for street naming and numbering.

1. Recommendation

- **1.1** That Cabinet approves the proposals for fees/charges and required policy/process changes as set out in this report and the associated appendices.
- **1.2** That delegated authority is granted of the Director of Environment and Housing in consultation with the relevant Cabinet Member and the Head of Finance to vary fees detailed in this report should a business need be established.
- **1.3** That the report be referred to Scrutiny Committees (Environment and Regeneration and Healthy Living and Social Care) for consideration.

2. Reasons for Recommendations

- **2.1** To obtain Cabinet's approval of the charging and fees proposed for 2019/2020.
- **2.2** To allow minor 'in year' charging variations to be made promptly should there be a particular business need to do so.
- **2.2** To allow the charges and fees proposed to be considered, by the relevant Scrutiny Committee.

3. Background

- **3.1** In October 2017, Cabinet approved the Income Generation and Commercial Opportunities Strategy. The Strategy sets out that as public funding becomes increasingly constrained and under more intense scrutiny, greater emphasis has to be placed upon self-generated income and developing and presenting products and services that will resonate with paying customers. The Strategy is based around a series of strategic objectives, with associated policy principles. These objectives and principles are intended to ensure the consistent consideration and implication of income generation proposals.
- 3.2 The Council delivers a number of chargeable services through the Directorate of Environment and Housing Services. These charges are set on an annual basis and this report sets out proposals for changes to fees and charges (with associated policy/process changes) for the Directorate. Within the Directorate charges are levied in Shared Regulatory Services (SRS) and Housing and Building Services, though the formers is the responsibility of the SRS Joint Committee with reports on the latter presented to Cabinet as part of the Housing Revenue Account budget Management process. This report therefore primarily concerns Neighbourhood and Transport Services. This Service Area is required to make significant financial savings in 2019/20 of approximately £600,000. This is in addition to the sustained period of budget reductions delivered over a number of years. As revenue budgets have reduced, income from fees and charges becomes ever more important as a way of sustaining priority services. The department has a wide range of income sources that feed into its operational budgets and these include Welsh Government grants, income from external works, civil parking enforcement fines, lease income and a number of fees that are levied to the public and the commercial sector. The projected income for the department for 2019/20 is £7.3m with approximately £1.3m of this income coming from the fees and charges detailed within this report.
- **3.3** As part of the action plan to deliver the Income Generation and Commercial Opportunities Strategy, a review of all existing fees and charges is underway. At times of financial pressure, there may be a temptation to propose high fee increases. However, this would not necessarily guarantee a commensurate income increase across all areas, as patronage of certain services could reduce. As advised in previous fees and charges reports, this is of particular concern with outdoor sports and services used by more vulnerable sectors of our community. These considerations are consistent with the Income Strategy and have informed the proposals contained in this report.
- **3.4** This report sets out the proposed fees and charges for the range of services offered by Neighbourhood Services and Engineering & Transportation. Specific details are provided within the body of the report for Cabinet's consideration where there are significant changes to the fees and charges or associated policy/processes involved. The remaining fees and charges are detailed in the appendices which show the current and proposed level of charges. It is recommended that unless mentioned in this report increase of RPI has been

applied rounded up to the nearest 10p. An Equalities Impact Assessment has been undertaken as part of the review of fees and charges and can be found in Appendix 4.

4. Key Issues for Consideration

4.1 The proposed charges for services for 2019/20 are set out in the appendices as follows:

Appendix 1 Neighbourhood Services Appendix 2 Engineering and Transportation Appendix 3 Porthkerry Cemetery

- **4.2** To ensure that current charges reflect inflationary pressures, it is proposed to uplift the majority of service fees by the amounts contained within the attached appendices. Charges from Barry Town Council proposed for Porthkerry Cemetery reflect the current arrangements at Merthyr Dyfan Cemetery, in Barry.
- **4.3** A number of charges are also proposed to increase to better reflect the actual costs of service provision in a move towards full cost recovery which is one of the objectives of the Income Generation & Commercial Opportunities Strategy and to generate additional revenue where this is appropriate and the analysis of demand suggests it is possible to do so. In some instances, this requires changes to the policy/processes involved and these are detailed below.

Neighbourhood Services (Appendix 1)

- **4.4** The majority of charges for Neighbourhood Services are proposed to increase in line with inflation (or slightly more reflecting take up of services and the cost of delivery). A small number of the fees and charges have remained the same as they are deposits which are refunded.
- **4.5** The following describe changes to fees/charges and associated policy/processes where an alternative approach has been followed.

King Square, Barry

4.6 The price of using King Square is proposed to increase at a rate higher than inflation to reflect the continued and strong demand for this facility. It is considered that should these fees be increased as recommended, demand will not be negatively impacted and result in an overall reduction in income. This is consistent with the policy principle contained within the Income Generation and Commercial Opportunities Strategy which states that "services that have the ability to achieve or exceed full cost recovery on a consistent basis are encouraged to operate more commercially in order to reduce dependence on core funding". As such, in addition to the changes to charges for Kings Square, work will continue to explore other ways of utilising King Square to generate revenue. Further proposals will be developed for Cabinet's consideration in due course.

Allotments

- **4.7** Cabinet endorsed the draft Allotments Strategy in March 2012. This Strategy set out the aim of working towards achieving full cost recovery for operating these facilities over time. This is also a policy principle contained in the Council's Income Generation and Commercial Opportunities Strategy which states "the Council will work towards achieving full cost recovery unless it is determined there are legal, strategic, wellbeing, or contractual reasons for not doing so". No legal, strategic or contractual reasons have been identified for not moving towards full cost recovery in this area.
- **4.8** Allotments provide an opportunity for allotment holders to improve their wellbeing through exercise and the production of food. In order to balance the wellbeing benefits of allotments with the costs to the Council of operating these sites, it is recommended that the price for allotments will increase over time towards full cost recovery and other means of management of them will also be explored. Further proposals on this will be developed for Cabinet's consideration in due course.
- **4.9** However, currently no charge is levied for the replacement of allotment keys. In order to cover costs of this service it is proposed to introduce a charge of £16.60 per replacement key in line with the fee for replacement Alley gate keys.

Dedications

- **4.10** A review of fees for dedication schemes took place in 2017/2018 as part of the Income Generation and Commercial Opportunities Programme. This review resulted in an increase in the price of bench plaques in 2018/19. Since the increased fee there have been many enquiries, although no new plaques have been placed. It is therefore suggested to reduce these fees in 2019/20 with the aim of increasing take up. Details of these fees are outlined in appendix 1.
- **4.11** The price of pier plaques is proposed to increase at a rate higher than inflation to reflect the continued and strong demand for these memorials. It is considered that should these fees be increased as recommended, demand and income will not be negatively impacted. This is consistent with the policy principle contained within the Income Generation and Commercial Opportunities Strategy.

Bulky Waste

4.12 It is proposed in future years to move towards the full recovery of costs associated with the service. The Council's bulky item collection service currently costs £15 per three items. Additional items are charged at £5 each up to a maximum of two items. It is recommended leaving this charge unchanged for 2019/20, but reviewing it for 2020 / 21 to move towards full cost recovery.

4.13 It was agreed by Cabinet during 2018/19 that certain recycling receptacles would be free to residents. It is proposed that the cost of certain recycling containers will remain free to assist in increasing participation in 2019/20.

Commercial Waste

4.14 A review of the commercial waste charges was made in 2018/19 in consultation with the income generation board. A report is currently being finalised in respect of the future of commercial waste although it is recommended to increase charges at a rate higher than inflation for food waste as the cost of collection and disposal is higher than our current charges. As part of this increased charge bin liners will be provided.

Permits for Items on the Highway

- **4.15** The Council currently levies a charge for permits to place skips, containers, scaffolding and hoarding on the highway. The duration of these permits was changed from 1 month to 2 weeks in 2018/19. Due to the amount of additional resource required for the change in duration of the permits, we recommend reverting back to monthly although with a proposal to increase the charge at a rate higher than inflation to keep the Council in line with neighbouring authorities. It is also recommended to remove the commercial rates due to the difficulties in distinguishing between commercial and residential customers. Demand should not be negatively impacted and this should result in an overall increase in income.
- **4.16** It is proposed to increase the charge of widening an existing crossover at a rate higher than Inflation to reflect the amount of officer resource that is required to deliver the service.

Street Naming and Numbering

4.17 To cover current staff costs in respect of the House name change it is proposed to raise this cost to £100.00 from £81.00. Currently no charge is levied for a proof of address letter or change of existing street name and therefore it proposed to introduce a new charge for each of these services to cover the Council's cost in undertaking these functions as listed in Appendix 2.

Engineering and Transportation (Appendix 2) Car Parks

4.18 Any possible changes to car park charges will be subject of a report to Cabinet Shortly.

Transportation

4.19 A separate review is due to take place in respect of Fare Paying School Transport services which will be the subject of a further report. Until that report is considered, school transport fees and charges will remain the same.

Porthkerry Cemetery (Appendix 3)

4.20 As in previous years, the charges proposed are those put forward by Barry Town Council who manage the Cemetery on our behalf. The rates are in line with those charged by Barry Town Council at their cemetery in Barry.

5. How do proposals evidence the Five Ways of Working and contribute to our Well-being Objectives?

5.1 It is necessary to review fees on an annual basis to ensure the continuation of services in light of increasing costs and reducing resources. The relevant part of the Corporate Plan is WO2 an Environmentally Responsible and Prosperous Wales.

This is undertaken in the context of the Wellbeing of Future Generations Act which requires the Council to consider five ways of working when making decisions. Thinking to the longer-term is a key consideration when setting fees and charges, to minimise the impact on the Council's ability to provide services in the future that the current budgetary pressures present. The proposals also seek to further the Council's Well-being Outcomes contained within the Corporate Plan. Fees and charges are proposed to further these objectives, within the context of the financial cost of doing so. There are no specific climate change implications arising from the fee increases proposed.

6. Resources and Legal Considerations

Financial

6.1 The fee increases outlined in this Report assist in reducing the budgetary pressures within the Directorate. All income from fees including grant income is being reviewed by the second phase of business transformation project underway for Neighbourhood Services and Transport.

Employment

6.2 There are no employment implications in this report.

Legal (Including Equalities)

- **6.3** Under relevant legislation the Council is permitted to charge for certain services it provides. Full details of the relevant legislation on fees and charges is contained in the Income Generation and Commercial Opportunities Strategy.
- **6.4** An equal opportunities scoping assessment has been undertaken and shows that there are no unacceptable adverse effects on the protected characteristics identified by the assessment. It is also considered that the charges proposed will not preclude any sectors of the community from accessing the services provided.

In particular blue badge holders will continue to be exempt from car parking charges.

7. Background Papers

None.
